W. P. STONE & CO.

Not that we think the people of Ypsilanti are particularly dirty, or that our robust and active competitors don't supply their customers with a good soap. We were offered the exclusive sale in this city of a pure Vegetable Oil 12oz. Cake of Laundry Soap, which could by squeezing a point, be sold at 5 cents per Cake. But this 12oz. Vegetable Oil Soap is unknown in this market. There are some people who think a common lye soap is good enough for there but there are hundreds of others who welcome any thing that mitigates the labor of Wash fying intelligence that the signaling ministers ordained, 11 died, 30 received Day. We shall give you no caustic soap, no rosin soap, and after using all will agree that the apparatus invented by their son, Lieut. soap we have adopted has few equals and no superiors.

Wishing to get a package of this Vegetable Oil 12oz. Soap into every family in Ypsilanti We shall have a SOAP DAY and sell you more soap on that day for less money than you ever bought before, or will again.

A FATAL RIDE.-Fred Brown, a boy thirteen years of age, son of James Prospect street, in the fifth ward, was crushed to death under the wheels of a Saturday morning. The accident occurred while the boy was engaged in "stealing a ride," as the boys term it, on the freight train. He boarded the train near the Prospect street crossing, and the spot where he fell under the wheels was near the Park street crossing. An inquest was held by Justice Joslyn Saturday evening, and a verdict stating that the boy lost his life through mother said that he had not been gone from the house but about fifteen minal was held Sunday afternoon.

CHAPTER III.—(CONTINUED.)

"So I perceive,' Ralph muttered draw her near him. "Remember, my beautiful wife, that you are mine now, and those absurd prejudices you have against me must be dispelled. Come, give me a kiss—a seal to our bridal.'

In spite of her shrinking he bent and would have kissed her, but the icy coldness of her lips chilled the warmth of his caress, and with a stifled oath he set her free.

"Perhaps you will be less indifferent in the future," he said angrily. "I will not annoy you now. The knowledge that you are my wife is joy enough for one day. Good-night."

"Good-night," Lily answered carelessly; but as the door closed upon him, she flung herself on her knees troing to stifle the bitter cry which rose to her lips.

"Oh, Heavens, how can I bear it? This daily torture will kill me! To hear his harsh voice and feel the touch of his hands on mine is horrible enough; but the contact of his lips is worse than death."

Sobs shook her firagile form, and tears fell thickly down her pallid cheeks. For the first time she thoroughly realized all she would have to endure—the mental suffering this hated marriage would bring into her life—and for a moment it seemed as if fate would be better than the one her father had forced upon her.

An icy hand as heavy as lead, Descending, as her brother speaks, Upon her heart, that has ceased to beat, Suspends awhile its life and heat.

Several months passed swiftly by, and Ralph had not yet been able to win his wife's heart.

If anything, she was colder-more indifferent to him-often rousing his worst passions by her quiet contempt. In vain Gipsy tried to draw them together; her gentle words were pow-

erless to bring peace into the house. Loving as Lily was to her, Ralph's that child shall not blacken my home tween them. "I wish you would be kinder to Ralph," she pleaded one day. "After

"Yes, you are ill, Gipsy, and I shall ask Dr. Leslie to come and see you. You are my only comfort, so I do not want to lose you."

Gipsy did not respond, she let Lily think it was bodily illness that made her face so pale and thin, and her eyes so sunken. How could she confess the truth—that her heart was broken, and the memory of a dead love fast draw-

ing her to the grave? Their tete-a-tete was interrupted by the sudden entrance of a maid, who came respectfully across the room. "If you please, madame, Mrs. Leigh

Gipsy did not speak, but her tremugrimly, stretching out his hands to lous lips were pressed to Johnny's fair cheek. Meeting his wondering halfpiteous look, she shook off the sudden gloom, and commenced a gay romp with him.

In the midst of it, whilst she still knelt on the floor, her dusky hair falling loosely about her face, her eyes sparkling with a light rarely seen in their depths, the door opened to admit

hearth. As if warned of an evil presence. Johnny stayed his sweet shrill laughter, and nestling trustfully in Gipsy's arms, gazed affrightedly at the intruder

"What does this mean? I thought at least a dozen children were playing in the house! Who is your young friend, Gipsy? How is it I have never seen him before?" Ralph asked slowly.

Almost unconsciously Gipsy hugged the child closer to her breast, and all the pretty colour faded from her cheeks, leaving them whiter than be-

"It is your own fault if you do not know little Johnny," she reported. "He is Peggy Leigh's child."

The frown deepened on Ralph's brow, and he glanced angrily at the tiny babe; furious passion was in his heart, but he dared not let it break beyond control.

"So you dared bring a murderer's low-born son into the house? I wonder at you, Gipsy, encouraging that woman here, when you know I have forbidden her the house!"

Lily glanced up as those words fell on her ears, and a haughty smile curied her lips.

"Peggy is here by my commands. I have work for her to do; and shall certainly not consult you in the choice of my needlewomen.

"Why will you always defy me? had escaped her careless gaze before. Why is it you always act contrary to my wishes, no matter what those wishes are?" he said hotly, moving to where she was so quietly sitting.

Her pretty brows were drawn together in a surprised pucker, and without lifting her eyes she answered his wild words with almost forced calmness.

"Because your commands are unjust, and you know it! Peggy is poor, and unless we give her work to do, she and her child will starve. How many people who now employ her would do so if I do not set the example? Until her husband's name is cleared, she will be forced to strive hard to earn a liv-

Jefferson as a Workman.

Jefferson, when president, had a workshop fitted up in the basement of the capitol, where with the assistance of a colored man, he made articles of furniture, now prized by their owners. He also made models of his inventions, generally impracticable, and an Eng-lish iron founder and machinist, Mr. Foxhall, used to discuss them with Among Mr. Jefferson's pet models

was one of an air tight stove, and Mr. Foxhall was astonished how such an idea could have originated in the mind of a person who had spent his life in a state whose almost illim table forests furnished a superabundance of fuel but an inspection of the de and its workings amazed him still more. Mr. Jefferson claimed that his stove would economize fuel and generate a continuous, genial, and uniform heat, and was highly sanguine on these special points. Mr. Foxhall, not altogether convinced, proposed to cast a stove at his foundry, which he did. Mr. Jefferson ordered a dozen or more in iron, which were delivered to him in a short time. He had two or three of them set up in the white house and presented the others as precious gifts to his friends, giving one to Mr. Fox-hall, who placed it in his office, which it never warmed. This is said to have been the original invention of airtight stoves, improved by Orr. It was made of cast-iron, was five feet high, and weighed 250 pounds. It was divided into two compartments and there was a central chamber about sixteen inches square for the fire, sur-rounded by other chambers to receive the hot air, an ingenious idea, which did not, however, work satisfactorily, as it was discoved when put into practical use, for by the time the stove was sufficiently warm the fire was generally burnt out and when more wood was put in both stove and room were quite cold before it could be got to burn properly .- Boston Budget.

There is a traveling magician in this town who frequents the big saoons and passes around the hat after he has performed some of his interesting feats of sleight-of-hand. He is particularly strong in dealing poker hands. In a gathering of five yesterday he dealt off-hand to one a pair of tens, to another a pair of jacks, to another a pair of queens to another a pair of kings, and reserved for himself a pair of aces. The four naturally asked for three cards each. The cards were graciously given that made each person hold four of a kind, the itinerant magician having reserved three cards, among which were two more aces. Immediately the magician was asked to teach two of the party the trick, they saying that they would pay liberally for the knowledge. The magician declined to do so, adding that he could have been rich long ago if he had cared to be dishonest.—New York

Business Principles.

A clothing dealer in an interior town had occasion to visit the city to purchase goods. While he was gone a young man entered his store to buy a coat. A salesman waited upon the customer and showed him a coat plainly marked \$7. The customer tried it on and said in a pleasant, confiding way: "I want a good article and I can afford to pay a little more." The salesman showed him many coats, and, finally, having removed the tag, again offered him the \$7 coat which had fitted him at first, and said. "Here is a coat, a fine article, just your fit, which I can sell you for \$12." The coat was again tried on, the young man seemed pleased, paid, his money, and went away. On the merchant's return the salesman, with a smile of triumph all over his countenance, rushed up to him and boasted of what he had done. The merchant looked grave. He only said: "Does any one know who the customer was?" A little boy had recognized him as a workman in a neighboring factory and remembered his name. The merchant sent for the young man, told him of his mortification, gave him back \$5 and the privilege of returning the coat if he chose, and then said to the salesman: "Now, sir, I will pay you your you cheat my customers you have not principle enough not to cheat me. The following words, in praise of Dr. Pierce's Favorite Prescription as a remedy for those delicate diseases and weaknesses peculiar to women, must be of interest to every sufferer from such maladies. They are fair samples of the spontaneous expressions with which thousands give utterance to their sense of gratitude for the inestimable boon of health which has been restored to them by the use of this world-famed medicine.

JOHN E. SEGAR, of Millenbeck, Va., writes:
"My wife had been suffering for two or three years with female weakness, and had paid out one hundred dollars to physicians without relief. She took Dr. Pierce's Favorite Prescription and it did her more good than all the medicine given to her by the physicians with the physicians wit THE GREATEST EARTHLY BOON.

Three bottles of your 'Favorite Prescription' restored me to perfect health. I treated with Dr. —, for nine months, without receiving any benefit. The 'Favorite Prescription' is the greatest earthly boon to us poor suffering women."

Writes: "I took eleven bottles of your 'Favorite Prescription' and one bottle of your 'Pellets.' I am doing my work, and have been for some time. I have had to employ help for about sixteen years before I commenced taking your medicine. I have had to wear a supporter most of the time; this I have laid aside, and feel as well as I ever did."

Mrs. May Gleason, of Nunica, Ottawa Co. Mich., writes: "Your 'Favorite Prescription' has worked wonders in my case. Again she writes: "Having taken several bottles of the 'Favorite Prescription' I have regained my health wonderfully, to the astonishattending to the duties of my household.

TREATING THE WRONG DISEASE.

Many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous exhaustion or prostration, another with pain here or there, and in this way they all present alike to themselves and their easy-going and indifferent, or over-busy doctor, separate and distinct diseases, for which he prescribes his pills and potions, assuming them to be such, when, in reality, they are all only symptoms caused by some womb disorder. The physician, ignorant of the cause of suffering, encourages his practice until large bills are made. The suffering patient gets no better, but probably worse by reason of the delay, wrong treatment and consequent complications. A proper medicine, like Dr. Pierce's Favorite Prescription, directed to the cause would have entirely removed the disease, thereby dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery.

distressing symptoms, and instituting comfort instead of prolonged

Mrs. E. F. Morgan, of No. 71 Lexington St., East Boston, Mass., says: "Five years ago I was a dreadful sufferer from uterine troubles. Having exhausted the skill of three physicians. I was completely discouraged, and so weak I could with difficulty cross the room ausing the local treatment recommended in his 'Common Sense Medical Adviser.' I commenced to improve at once. In three months I was perfectly cures, and have had no trouble since. I wrote a letter to my family paper, briefly mentioning how my health had been restored, and offering to send the full particulars to any one writing me for them, and enclosing a stamped-envelope for reply. I have received over four hundred letters. In reply, I have described my case and the treatment used, and have earnestly advised them to 'do likewise.' From a great many I have received second letters of thanks, stating that they had commenced the use of 'Favorite Prescription,' had sent the \$1.50 required for the 'Medical Adviser,' and had applied the local treatment so fully and plainly laid down therein, and were much better already."

JEALOUS

Of Crystal, Mich., writes: "I was troubled with female weakness, leucorrhea and falling of the womb for seven years, so I had to keep my bed for a good part of the time. I doctored with an army of different physicians, and spent large sums of money, but received no lasting benefit. At last my husband persuaded me to try your medicines, which I was loath to do, because I was prejudiced against them, and the doctors said they would do me no good. I finally told my husband that if he would get me some of your medicines, I would try them against the advice of my physician. He got me six bottles of the 'Favorite Prescription,' also six bottles of the 'Discovery,' for ten dollars. I took three bottles of 'Discovery' and four of 'Favorite Prescription,' and I have been a sound woman for four years. I then gave the balance of the medicine to my sister, who was troubled in the same way, and she cured herself in a short time. I have not had to take any medicine now for almost four years."

IF the democrats should realize their hope of filling the vacancy in Congress from the second Rhode Island district, the state delegations in the House would be evenly divided between the two parties, and neither could elect a President there. If Riddleberger should conclude to vote with the democrats in the Senate, the Senators would be evenly divided and neither party could elect a Vice President to act as President in such a case. So, if the people shall fail to elect, we would have nobody for President, which would be very bad. It is better for us to elect the President ourselves.

Curtis, whom we knew several years ago as the Washington correspondent of the Inter Ocean, furnishes in the September Harper's a description of the Argentine Republic that reads like Gulliver's travels; and yet we suppose it is true. When we studied geography in 1850, the map described a state of Buenos Ayres, with a capital city of the same name on the River de la Plata, and around it on two sides was the Argentine Confederation. reaching to the Chilian boundary at the summit of the Andes on the west, and to the Patagonian boundary on the south. Patagonia, said then to be inhabited by wild horses and gigantic and fierce savages, reached from ocean to ocean, and to the point of the continent southward. Now, what was Buenos Ayres, and the Argentine Confederation, and Patagonia except the narrow strip between the Andes and the Pacific, which is given to Chili, form the Argentine Republic, with fifteen states and four territories; and the silvery name which the greedy Spaniards mistakenly placed both upon the river and upon the country, in Spanish and Latin, the river of silver and the silvery confederation, is being justified by the wealth she is creating, in ways more permanent and useful than mines of silver could have given. The amazing development of the country and the growth of cities will take our people by surprise; and surprise in an unpleasant way, presently, when we realize how formidable will be their competition in the production of breadstuffs and provisions. Beginning to export cereals in 1884, they shipped last year \$7,500,000 worth, and this year it will be \$10,000,000; and they can put their wheat on board at 60 cents a bushel, They have 30,000,000 cattle, and 100,000,-000 sheep, and a cow can be bought for \$5, a fat steer for \$10, a pair of oxen for \$25, a sheep for 50 cents, and a working horse for \$10. One company ships 7,000 carcases a week. They have \$30,000,000 invested in wire fences, and one firm in Buenos Ayres sold 1200 American reapers last year. That city is growing faster than Minneapolis, and received 124,000 European immi-

Their public land laws are more liberal than ours—250 acres free to each head of a family, 1500 acres free after five years by planting 200 to grain and 24 to timber, free transportation to all settlers and their families, exemption from taxation for ten years, and government guaranty of bonds of colonization societies that loan money to settlers at six per cent. The result last year was 900,000 acres of wild land plowed. Grazing "companies with \$5,000,000 capital are common, and those with \$10,000,000] are not

The city of Buenos Ayres is another Chicago. Five railroads radiate from it; 122 miles of street car tracks already exist; "more telephones in proportion to the population than in any other city on the globe;" electric light in more general use than in New York or Boston; nine theatres constantly open: 21 daily papers; nine banks with more than \$1,000,000 capital—one with \$20-000,000 and one with \$37,000,000, the latter having \$22,000,000 circulation and \$56,000,000 deposits; and the average BOOKS, BOOKS, BOOKS deposits are \$64 per head for the whole population of the country. There are 4,200 miles of railroads in operation, and \$50,000,000 of extensions in progress -all owned or subsidized by the government; and the average dividends are over six per cent. Pullman sleepers run across the country, and will soon ico by the Isthmus to connect our system with the South American, and we may ride in a Pullman car from New York to Beunos Ayres, from the St. Lawrence to the La Plata, and from

Oh God, thy providence surrounds Throughout the liveling day; Thy plenteous goodness still abounds

Where'er I take my way. As on my head thy sunlight falls, Or darkness clouds my path, No coward fear mytheart appals,

Of mercy clothed in wrath. 'Tis mercy, mercy, all alone, 'Tis love, 'tis goodness pure, That all my life on me has shone

And helped me to endure What was not bright but still was good-What seemed most hard to bear-When I with stubborn heart withstood

And failed thy grace to share. Oh highest knowledge, wisdom, all, That guides me on my way, And lifts me, when my feet would fall,

TRUTHS FOR THE SICK.

The entire Protestant missionary force now at work among the heathen and Mohammedan nations is estimated by the Rev. James Johnson, in the Missionary Review, to number 3,000 ordained missionaries, 730 laymen, and 2,500 women helpers. These 6,230 missionaries are preaching the Gospel to-day in twenty times as many languages as were spoken on the day of Pentecost. If the 870,000,000 heathen mouth. Frank Smith, druggist. and 170,000,000 Mohammedans were equally apportioned to these 6,230 agents, it would give 167,000 persons to each man and woman engaged in the work. The force is, however, very unequally distributed; and some missionaries may be found with less than a thousand heathen under 8their care, while others are as one in the midst of millions. There are, also, 26,000 native converts now employed and paid as evangelists among their own countrymen, and 2,500 are ordained than twelve millions of dollars-collected by more than a hundred missionaries in Great Britain, America, and on the Continent—are now applied to work of foreign missions by Protestant Chris- rups worth a thousand dollars, is also tians. New Era in the Treatment of all Blood, Liver and Kidney Diseases

THE CREATEST BLOOD PURIFIER IN THE WORLD. IT TAKES EFFECT INSTANTLY.

As an ANTI-BILIOUS MEDICINE it is incomparable. It stimulates the Torpid Liver, invigorates the Nervous System, gives Tone to the Digestive Organs, creating perfect digestion and thorough assimilation of food. It exerts a powerful influence upon the Kidneys and Liver, and through these organs removes all impurities, thus vitalizing the tissues of the body and causing a Healthy Condition of the System.

IT IS THE SIMPLEST, MOST CONVENIENT, SURE, AND SPEEDY CURE ON EARTH!

SPECIAL NOTICE:—Ten M. I. S. T. Pills will cure any case of chills on earth. We have the largest number of printed recommendations of any medicine extant. One of the peculiar methods of the M. I. S. My daughter suffered from Rheumatism for nearly a year, which was so painful at times her screams could be heard for a block away; she could hardly walk, her ankles were so out of shape; she also suffered with St. Vitus' Dance. One box of M. I. S. T. cured her.

MRS. MARY A. GALEY, 370 Franklin Street, Detroit, Mich.

I have suffered with Dyspepsia, Liver Complaint, General Debility, Flux and Rheumatism foten years; have tried everything, but found no relief until I began taking M. I. S. T. I got relie from the beginning; I have taken six boxes; I feel well and strong. I cannot say enough for it.

Mrs. Robertson, Professional Nurse, Detroit, Mich.

Most heartily I endorse this wonderful remedy, M. I. S. T., to those afflicted with Constitution, Dyspepsia, Kidney and Liver Troubles. My trouble was caused by exposure and hardships in the late war. I have taken two boxes with pleasing results. I recommend it to everybody: it always gives satisfaction.

A RECENT attempted elopement came to a peculiarly unromantic end. At Frankfort, Ky., Frank Reeser was about to elope with Mary Valder, and had succeeded in getting her out of her room all right, but when he went back to get some jeweley and more of her clothing the pair were discovered. Frank was arrested for burglary and Mary returned to her parents.

A WARRANT was issued last week at Seattle, Washington territory, for the arrest of Juryman W. W. Easter for contempt of court. The charge was made by a brother juryman that Easter refused to del berate on a case in order to keep the jury out so as to gain an extra day's pay. The charge is an unusual one, and the first that ever George C. Young & Bros.' dry goods escame under the observation of the

An inhertance of 150,000 frances has just fallen to the ezarowitch. This sum was left him by a Russian singer named Marie Fillo. In her will she says: "This legacy is only a restitution. A near relation of his imperial highness gave me this money. I return it to him who would have had it if I had not lived," The exarowitch has accepted the legacy, and has distributed it among the Moscow hospitals.

A RICH widow of California recently resolved to disinherit her daughter because of her elopement. Soon afterwards she learned that the parents of the groom had closed their doors against the young couple. She became angry at this, declaring that her daughter was just as good as any woman on earth, and concluded by forgiving all, presenting the bride and groom with a comfortable share of her home and fortune.

Thus an anxious couple may arrive Saturday night and leave Monday morning happily united. Many of these candidates of wedlock take the way to Heligoland in order to escape the long legal notice, and perhaps also the long comments at home. Others, again, choose the island route to the hymeneal altar in order to save the average church attendance on Sunday expenses of a costly wedding and to have a wedding and bridal tour all in one. The expense of having the knot tied on the island is not a cheap as many people imagine, and certainly not less than 200 marks, one-half of which sum goes to the officiating (German) clergyman. The Archbishop's Romance.

One day at breakfast Archbishop Whately told us a remarkable story of woman who married when very young a soldier, and was wrecked with him on the coast of India. All the crew and passengers were supposed to have been lost, except this one woman and an officer who saved her. She was very beautiful, and he educated and married her. In time she became a widow and returned to England. He had left her all his money, and she was well received by his relations, being still very charming. One day her maid told her she was going to be married to a discharged soldier. The mistress approved and asked to see him. When he was introduced, after looking steadily at him for some minutes, she went up and fetched a shawl. "Do you know that shawl?" 28th ult., and died eight days after, am your wife!" she exclaimed. West Point and Its Cadets. And so here I am, in the heart of

"Rip's" country- his very "stampingground," i. e., Highland Falls, with its Dutch gables and dumpy cottages, lolling lazily in the sunshine almost beneath the window where I write. Irving indicates a spot somewhat lower down and on the other side of the river as the scene of that long and dreamless slumber. But I am sure "Rip" has danced many a time on the hillslopes hereabout, and had many a carouse in the old tavern down by the water's edge. From the east portico of Cranston's may be seen the roof of a house which witnessed a transaction second only to the betrayal of Christ. Within that house, whilst "Rip Van Winkle" lay asleep upon the mountains. Benediet Arnold sold his country for a price, and from that house John Andre proceeded across the Hudson and down the Tarrytown to his doom. me. Surely nothing in Alpine scenery can surpass them. But they are summer not winter pictures. Here Shakespeare's "brownies" had found a loveliness far in excess of their Warwickshire, and Drake's "favs" made such revels as had given a new conception of fairyland to "Puck" himself. The forest of Arden was not richer in woody virtues than these deep greeneries; the River of Crystal that flowed through the gardens of the Enchanted Palace gave back no such reflections as the Hudson, nor bore upon its bosom freights so precious. Far be it, however, from this old gray goosequill of mine to plunge into the descriptive, I mention the circumstance to mark a very striking contrast, which may be observed, between the cadets at West Point and the grandeur of the topographic setting in which they appear and to which they seem its chief animation. There is nothing, I am sorry to say, very imposing about them. They are a sad-eyed, pale-faced, stumpy set of lads. Old Winfield Scott, who lies over there in the churchyard-nearly seven feet in his skeleton-must go back to his coffin from his nightly rounds, sick at heart, to see these meagre striplings and to consider the future of the army with them as its captains. Old and New-Past and Present

The young people and children of to-day who enjoy the privileges accorded them by a generous public in the way of facilities for obtaining an education, necessarily have a very poor conception of the disadvantages under quire knowledge; and in no respect has progress of our country for the past half century, been more marked, han in the improvement in its school houses, school furniture, school books, and school teachers.

There were but few women teachers, and they were confined to the towns and villages, and very scarce even there. Moral suasion not cut much of a figure in the government of the schools, but a hickory switch was one of its most important pieces of furniture. It stood just behind the teacher's chair, in good salary.

The people take pride in making them just what they ought to be, and the community's intelligence and prosperity is measured by its attention to the public schools.

Fat Women Seek Thinness.

If the visitor be desirous of seeing the very fattest woman produced by the Continent let him run across the Bohemian frontier to Marienbad, and when the band plays he will see them rolling, literally rolling, along the paths in the forest to the orchestra in all degrees of obesity, past the wildest imagination to picture. Marienbad has the credit of producing fat. I sat at the table d'hote one day there, wedged in among fat women, and saw and heard them eat. Then I ceased to wonder that they were fat, and my opinion of the powers of the Marien bad waters to reduce such vigorous and omnivorous eaters into moderate porportions rose to a high pitch. This is what the fat lady opposite me ate: Soup, boiled beef, veal cutlets, roast pork, raw herring and onions, baked veal, then ordered "gefullte taube." stuffed dove, and when she had eaten

JONATHAN'S SINFUL ACT.

Plenty of this luscious product was hanging in the woods of Bethaven during the time of Saul and Jonathan. Their army was in pur-

Saul and Jonathan. Their army was in pursuit of an enemy that by God's command must be exterminated. The soldiery were positively forbidden to stop to eat anything until the work was done. If they disobeyed they were accursed. Coming through the woods they found a place where the bees had been busy, a great honey manufactory. Honey gathered in the hollow of the trees until it had overflowed upon the ground in great profusion of sweetness. All the army obeyed orders and touched it not save Jonathan, and he not knowing the military order about abhe not knowing the military order about ab-stience dipped the end of a stick he had in his hand into the candied liquid and as yellow and brown and tempting it glowed on the end of the stick he put it to his mouth and ate the of the stick he put it to his mouth and ate the honey. Judgment fell upon him, and but for special intervention he would have been slain. In my text Jonathan announces his awful mistake: "I did but taste a little honey with the end of the rod that was in my band and lo, I must die." Alas, what multitudes of people in all ages have been damaged by forbidden honey, by which I mean temptation, delicious and attractive but damaging and destructive.

BAD LITERATURE'S EFFECTS.

Literature, fascinating but deathful, comes in this category. Where one good, honest, healthful book is read now there are 100 made up of rhetorical trash consumed with avidity. When the boy on the cars comes through with a pile of publications look over the titles and notice that nine out of ten of the books are dealering and improve All, the way from BAD LITERATURE'S EFFECTS notice that nine out of ten of the books are depleting and injurous. All the way from New York to Chicogo or New Orleans notice that objectionable books dominate. Taste for pure literature is poisoned by this secun of the publishing house. Every book in which sin triumphs over virtue, or in which a glamour is thrown over dissipation or which leaves you at its last line with less respect for the marriage institution and less abhorrence for the paramour, is a depression of your own moral character. The book bindery may be attractive, and the plot dramatic, and startling, and the style of writing sweet as the honey that Jonathan dipped up with his rod, but your best interests forbid it, your moral safety forbids it, your God forbids it, and one taste of it may lead to such bad results that taste of it may lead to such bad results that you may have to say at the close of the experiment or at the close of a misimproved lifetime: "I did but taste a little honey with rod that was in my hand, and, lo, I must

the shade, and his wife and children in the shade, and his immortal destiny in the shade. Now, I find on some of the liquor signs in all our cities the words "Old Crow," mightily suggestive of a carecass and the filthy raven that swoops upon it. "Old Crow!" Men and women without numbers slain of rum but unburied, and this evil is pecking at their glazed eyes, and pecking at their bloated cheek, and pecking at their destroyed manhood and womanhood, thrusting beak and claw into the mortal remains of what was once gloriously alive but now morally dead. "Old Crow!" But alas, how many take no warning. They But alas, how many take no warning. They make me think of Cesar on his way to assassination fearing nothing; though his statue in the hall crashed into fragments at his feet, and a scroll containing the names of the con-spirators was thrust into his hands, yet walk-ing right on to meet the dagger that was to take his life. This infatuation of strong drink is so mighty in many a man that though drink is so mighty in many a man that though his fortunes are crashing, and his health is crashing, and his domestic interests are crashing, and we hand him a long scrolt containing the names of perils that await him, he goes straight on to physical and mental and moral assassination. In proportion as any style of alcoholism is pleasant to your taste, and stimulating to your nerves, and for a time delightful to all your physical and mental constitution, is the peril awful. Remember Jonathan and the forbidden honey in the woods of Bethaven.

THE HUNGER FOR GAMING.

Furthermore, the gamster's indulgence must be put in the list of temptations delicious but destructive. I have crossed the ocean eight times, and always one of the best ocean eight times, and always one of the best rooms has, from morning till late at night been given up to gambling practices. I heard of many men who went on board with enough money for European excursion who landed without enough money to get their baggage up to the hotel or railroad station. To many there is a complete fascination in games of hazard or the risking of money on possibilities. It seems as natural for them to but as to as It seems as natural for them to bet as to eal Indeed the hunger for food is often over powered with the hunger for wagers, as in the case of Lord Sandwich, a persistent gambler who not being willing to leave the dice table long enough for the taking of food, invented to the control of the c named after Lord Sandwich. It is absurd for those of us who have never felt the fascina-tion of the wager to speak slightingly of the temptation. It has slain a multitude of in-tellectual and moral glants—nen and women stronger than you or I. Down under power went glorious Oliver Goldsmith, Gibbon the historian, and Charles Fox statesman, and in olden times fam senators of the United States, who used to as regularly at the gambling house all as they were in the halls of legislation 10, the tragedies of the faro table! or, the trage deeper of the large label. I know persons who began with a slight stake in lady's parlor and ended with the suicide pistol at Monte Carlo. They placed with t square pieces of bone with black marks them, not knowing that Satan was playing fitted. sweep all the stakes off on his side of the table

CARD PLAYING ALSO WRONG.
The last New York legislature sanctioned the mighty evil last spring by passing a law for its defense at the race tracks, and many young men in these cities lost all their wages young men in these cities lost all their wages at Coney Island this summer, and this fall are borrowing from the money tills of their employers, or arranging by false entries to adjust ther demoralized finances. Every man who voted for the Ives pool bill, has on his hands the blood of these souls.

But in this connection some young converts say to me: 'Is it right to play cards? Is there any harm in a game of whist or euchre?' Well, I know good men who play whist and euchre and other styles of game without any wagers. I had a friend who played cards with his wife and children and then at the

close said: "Come, now, let us have prayers." I will not judge other men's consciences, but I tell you that cards are in my mind so associa-ted with the temporal and eternal damnation of splendid young men that I should no soo er sav to my family. "Come, let us have game of cards," than I would go into a me agerie and say: "Come, let us have a gan of ratlesnakes," or into a cemetery, and sting down by a marble slab, say to the gradients of the same o ting down by a marble slab, say to the grave diggers: "Come, let us have a game of skulls." Conscientious young ladies are silently saying to me while I speak: "Do vou think cardplaying will do us any harm?" Perhaps not, but how will you feel if in the great day of eternity, when we are asked to give an account of our influence, some man will say to you: "I was introduced to games of chance in the year 1887, in Brooklyn, in your house, you: "I was introduced to games of chance in the year 1887, in Brooklyn, in your house, and I went on from that sport to something more exciting, and went-on down until I lost my business, and lost my morals, and lost my soul, and these chains that you see on my wrists and feet are the chains of a gamester's doom, and I am on my way to a gamblers hell."

WALL STRE' T'S EVIL WORK.

Stock gambling comes into the same catalogue. It must be very exhilarating to go into Wall street, New York, or State street, Boston, or Third street, Philadelphia, and depositing a small sum of money run the risk of taking out a fortune. Many men are doing an honest and safe business in the stock market and you are an ignoramus if you do not know that it is just as legitimate to deal in stocks as to mentation from any of our rougher sex. That young man or woman can by the right literary and moral improvement of the spare ten minutes here or there in every day, rise head and shoulders in prosperity, and character, and influence above the loungers who read nothing or read that which bedwarfs. See all the forests of good American literature dripping with honey. Why pick up the honey-combs that have in them the fiery bees which will sting you with an eternal poison while you taste it?

INFLUENCES FOR GOOD.

One book may for you or me decide everything for this world or the next. It was a turning point with me when in Wynkoop's bookstore, Syracuse, one day I picked up a book called "The Beauties of Ruskin." It was book called "The Beauties of Ruskin." It was with them. The great steamer goes down,

and all the little boats are swallowed in the and all the little boats are swallowed in the same engulinent. Gambling is gambling, whether in stocks or breadstuffs, or dice or race track betting. Exhilaration at the start, and a raving brain, and a shattered nervous system, and a sacrificed property, and a destroyed soul at last. Young man, buy no lottery tickets, purchase no prize packages, bet on no base ball games or yatch racing, have no faith in luck, answer no mysterious circulars proposing great income for small investment.

Go out and make an honest living. God on your side and be a candidate for heaven. Remember all the paths of sin are banked with flowers at the start, and there are plenty of helpful hands to fetch the gay charger to your door and hold the stirrul while you mount. But further on the horse plunges to the bit in a slough inextricable. The best honey is not like that which Jonathan took on the end of the rod and brought to his lip, but that which God puts on the banqueting table of mercy, at which we are all invited to sit. I was reading of a boy

bodies wery consumed. Poor Shelley! He would have no God while he lived, and he probably had no God when he died. "The Lord knoweth the way of the righteous, but the way of the ungodiy shall perish."

Think for Yourself.

Earnest, independent thought on the part of any boy or young man who has set out to make a mechanic of himself will certainly bring him both knowledge and skill in his chosen calling, remarks F. L. Johnson in The American Machinist.

We hear or see statements every little while that as machine shops gradually grow into manufacturing concerns the work is systemat'zed until there is nothing but routine in the different classes of work, and a boy apprenticed to one of these establishments "gets no show" in the shop,

and is "no good" when his time is out. That a graduate from, say, a steam oump shop, going to any other shep doing a different class of work, must work for small wages, in order to "hold a job," because he connot take hold of work as it comes along and do it intelligently. He is pictured as being sent out of the shop to make repairs upon a steam engine, or line up a shaft in a brewery, or to fix an

hydraulic elevator that is on a strike. After wasting an hour or two of time, he admits that he is "stuck," and goes crest-fallen back to the shop, taking this message to the foreman, "Send up a machinist next time." And then the parties get their work done at some other shop, and refuse to pay for what our pump man has done, because he d d not know what he was about. He actually caused damage by his ignorance. Why is this? He might have been a good man in a pump. shop, but fails immed ately on attempting printing press or sewing machine work. He has learned to turn and bore, to plane and slot, or chip, file and scrape but he fails when asked to perform any of these operations on anything except a steam pump. It is because he has not learned these things well, or because he did not use his brans while learning to use his

Machine shops are always overrun with applicants for apprenticeship. But ninetenths of the applicants for places never think of anything beyond getting into the shop. Of there own fitness for the machinists' trade they never inquire into. They expect to work three years for a little less pay than they could get shovelling, and then blossom at once into a first-class, well-paid machinist, with no particular mental effort on their part. result is easy to see. We see it every day in the army of workmen who car do only the commonest kind of skilled work, and oftentimes in only a single branch of the trade of which they

call themselves masters. This, I claim, is from want of thought on the part of the boy or man himself. The steam-pump man, if he has mastered the trade as far as the steam-pump shop, has mastered the principles upon which the steampump operates, and is a competent man to send out to repair a gas engine or a printing press. But this he cannot do without thought, and thought is but another name for study. The study that it takes to master the principles of the steam pump will incidentally bring knowledge of other machinery that cannot fail to be of use

sometime. A boy once taught the habit of individual thinking about his work, a place in front rank of mechanic is sure to be his. Thought will give him confidence and skill, and with these two elements in his mechanical make up he will prove a valuable man anywhere he is employed, whether they build sawmill machinery or machine tools to build sawmill machinery with.

My Kingdom for a Horse.'

It cannot be denied that the above was a rather generous offer, and had one of our sharp Ypsilanti horse traders happened to be on the ground Richard cound have had a good horse for his contested kingdom. But, while speaking of generous offers, what do you

think of this: A Hand-Made Single Harness for \$12.00 A Better Harness for - -And one yet Better for - - 18.00

These are not dramatic offers to win applause from the galleries, but actual business offers made by

"Hello, Dick, old boy; give us a light. Thanks. By the way, Dick, where is it you get your Clothing? Now my clothes, which I got same time or thereabout, look rumpled up, out of shape, and no style; while yours look as well as if the best tailor in the state

"Why, Jo, my dear fellow, you must go to JOE SANDERS' if you want good clothes and a fit. You see it don't cost any more to get the style and that, if you go to Sanders', HORSE! A HORSE! than it costs to dress like you. Ta-ta, old fellow. Try Sanders next time, and you'll be suited, and you wont be paralized by your suspender button flying off when you make a bow to a lady acquaintance on the street, either."

"The Early Bird Gets the Worm." Yes, we know the old gag about the foolish worm, but what I want to impress upon your mind is the fact that I have the greatest improvement of the age in COAL STOVES.
